## Overview

---

Use our simple solar panel calculator to figure out how many solar panels do you need. It'll help you determine the right system size and cost for your home. Most homeowners need between 15-25 solar panels to power their entire home, but this number varies significantly based on your energy usage, location, and roof characteristics. If you're consuming 1,000 kWh per month in a sunny state like California, you might need just 16 panels, while the same. Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover.
