# **65 kWh solar container battery price**

## Overview

---

Adding an energy storage battery to a residential solar panel system typically costs \$7,000 to \$18,000. The final price depends on what you buy and who installs it. All-in BESS projects now cost just \$125/kWh as of October 2025 <sup>2</sup>. With a \$65/MWh LCOS, shifting half of daily solar generation overnight adds just \$33/MWh to the cost of solar. This report provides the latest, real-world evidence on. A new analysis from energy think tank Ember shows that utility-scale battery storage costs have fallen to \$65 per megawatt-hour (MWh) as of October 2025 in markets outside China and the US. At that level, pairing solar with batteries to deliver power when it's needed is now economically viable. Prices span from compact trailers to large hybrid BESS containers, with examples across multiple vendors and platforms. This dramatic cost reduction is transforming.
