

Espay Solar Energy S.L.

A-level solar panel size

Overview

One residential solar panel is often around 1.6 m². A 6 kW system might take up 29 – 32 m² of roof space, depending upon the rated capacity of the panels. Panels can be installed in portrait or landscape orientation to make the best use of the available roof space. The size, shape, and slope of your roof are also important factors to consider. You should also consider the age of your roof and how long until it will need to be replaced. Find out what size rooftop solar system you can get to suit your electricity use and budget and that makes best use of your roof. Working out the best system size can be complicated.

A-level solar panel size

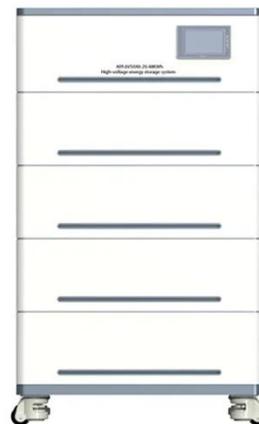

Size your solar system

The size of a rooftop solar system refers to the total power-generating capacity of all the solar panels, measured in kilowatts (kW). The system size depends on the number of solar panels and the rated ...
