

**Espay Solar Energy S.L.**

# **Advantages of Namibia Suifu container substation**

## Overview

---

Containers are easy to transport and fast to install, by reducing foundation works as well as installation and commissioning effort on site. What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas with high pollution, high humidity, extreme temperatures or sand storms. It utilises an Ethernet network and replaces the traditional analogue cabling. The new Sekelduin substation, due to be completed in early-2025, is being constructed to meet increased demand for power resulting from rapid growth of the coastal city and surrounding areas and to cater for future expansion in the region.
