Berlin solar energy policy

Overview

In order to accelerate the energy transition, Berlin, Germany launched the SolarPLUS Program in 2022. As a core part of the SolarCity strategy, it aims to promote the installation of solar energy systems in households and small businesses. Berlin's mandate for solar installations on new and renovated roofs has spurred rapid rooftop expansion, but the German capital remains far from its 2035 clean energy goal. In addition to new builds, existing buildings are included, where there are significant alterations to the roof.

Berlin solar energy policy
