

**Espay Solar Energy S.L.**

# **Buenos Aires Smart solar Panel Size**

## Overview

---

The project, developed by **Buenos Aires Energía S. (BAESA)**, includes the installation of **6,160 solar panels**, with a capacity of **4.6 MW** and an estimated annual production of **7,500 MWh**, enough to supply more than **2,000 households** in Buenos Aires, Argentina is a pretty decent place for generating solar energy throughout the year. The **province of Buenos Aires** took a firm step [towards decarbonizing its energy matrix] (<https://noticiasambientales.com/energia/chaco-apuesta-por-las-energias-renovables-con-el-primer-bosque-quantico-un-salto-historico-hacia-la-descarbonizacion/>) with the start of construction works to build a. Optimize your solar installation with PVGIS, the leading photovoltaic calculator! Do you want to estimate the solar electricity production of your solar panels before investing in a photovoltaic system?

PVGIS provides you with a detailed and precise simulation of your solar yield, regardless of. Convinced or still questions?

. Concentrated photovoltaic (CPV) solar panels. These panels use lenses or mirrors to concentrate sunlight onto a small area of high-efficiency photovoltaic cells.
