RS485
Communication between battery and inverters
Baud rate:9600bps

RS485 Interface
Communication between parallel packs or BMS and PC
Baud rate:9600bps

Overview

To cater to the growing demand for camper van conversions, Toyota has made the 2023 Hiace highly customizable. The van can be equipped with a range of optional upgrades. The 30amp MPPT solar charge controller converts the solar energy into storable energy. It also holds three solar panels, lights on the sides, and a Maxxair Deluxe vent fan. Other notable exterior upgrades are a Kickass outdoor shower tent, a fold-down outdoor table, and brackets to which an awning can be attached. There's also an Anderson plug to which foldable solar panels can be connected. Learn how to install Renogy RSP200D 200W solar panels on a Toyota Hiace camper van in Japan, connected to the Jackery 2000 Plus. We're foreigners living in rural Japan, traveling off-grid in our Toy Factory Hiace. Victron's MPPT (Maximum Power Point Tracking) technology is highly efficient, even in low-light conditions, making it ideal. Have you tried out dark mode?

! Scroll to the bottom of any page to find a sun or moon icon to turn dark mode on or off! Big thanks to everyone who helped me out with my first drawing. What's included in our Kits?
