

**Espay Solar Energy S.L.**

# **Cashback on investment in photovoltaic panels**

## Overview

---

The return on investment of a solar panel installation depends on its location, performance, efficiency and size, but 10% is average. You can maximize your solar panel ROI by taking advantage of rebates and other incentives and participating in net metering through your local. Though solar is a big purchase up front, that investment quickly pays for itself in energy savings over the life of ownership. The payback schedule is accelerated by state and federal tax incentives that reward people who invest in green energy. A grid-tied system can pay for itself in around 3 to. Solar panels aren't just an environmental statement - they're a financial investment that can deliver impressive returns for decades. 9% to home values (nearly \$29,000 for median homes) while enabling solar homes to sell 20% faster than comparable non-solar properties. It's figuring out how much of a financial investment you're looking at, and when you'll reach that "break-even" point after investing in your own solar panel array.
