## Overview

---

China's overhaul of its power market and the rapid expansion of AI-driven data centers are reshaping the global energy storage landscape, turning Chinese battery makers into dominant exporters worldwide. It is currently the largest single electrochemical storage facility in the country (Image: Ma Mingyan / China News Service / Alamy) In February 2025, China shelved a requirement that new domestic wind and solar projects be bundled with energy storage. China's power market restructuring is strengthening the economics of energy storage just as.
