On the basis of ensuring smooth user communication and normal operation of base stations, it realizes. The cabinet houses critical components like main base station equipment, transmission equipment, power supply systems, and battery banks. Meanwhile, the pole serves as a mounting point for antennas, Remote Radio Units (RRUs), and other equipment, often resembling a “candied hawthorn stick” in its. Power factor corrected (PFC) AC/DC power supplies with load sharing and redundancy (N+1) at the front-end feed dense, high efficiency DC/DC modules and point-of-load converters on the back-end. For this reason, battery backups and generators are installed in a wireless base station's power supply system to allow continuous operation under all circumstances.
