

**Espay Solar Energy S.L.**

# **Cyprus Smart Photovoltaic Energy Storage Container Fast Charging**

## Overview

---

Located at the CPT premises in the Geri area near Nicosia, the station is a smart energy hub that combines solar energy generation, battery storage, and EV charging — all in one intelligent system. In a landmark step toward a greener future, Cyprus Public Transport (CPT), in partnership with Ecotricity Holdings Ltd and its subcontractor Huawei Greece, has successfully completed the installation and commissioning of Cyprus's first of its kind photovoltaic (PV)-powered, battery-integrated. Advanced AI-driven Energy Management System for Photovoltaic-powered and Battery integrated Electric Vehicle charging stations. This article explores how advanced battery technologies and smart grid solutions can optimize charging pile performance while addressing. The Apollon PV Park has commissioned a 3.3 MWh battery energy storage system (BESS) and solar project, in a milestone for Cyprus. From ESS News Cyprus has taken a step toward modernizing its energy infrastructure with the commissioning of a 3. The project marks a national first and reflects a growing shift towards sustainable mobility.
