Do solar panels come with water tanks

Overview

Yes, most systems integrate with standard tanks or add a solar pre-heat tank. How much roof space is required?

Typically, 40–80 square feet of unshaded roof space. Solar water heaters use thermal collectors, not photovoltaic. Solar water heaters come in a wide variety of designs, all including a collector and storage tank, and all using the sun's thermal energy to heat water. Not only do these systems significantly reduce utility costs—by as much as 80%—but they also foster energy. Use the power of the sun to heat your water. Choose from a variety of options to store your hot water and provide backup capabilities if necessary.
