# **Does the power supply station allow the installation of photovoltaic panels**

## Overview

---

Only qualified persons can install and wire the PV system electrical components [690. See Article 100 for this definition. There have been changes throughout the entire 2023 NEC that may affect the installation of photovoltaic (PV) systems. However, this article will concentrate on the changes in Article 690, Solar Photovoltaic (PV) Systems, Article 705, Interconnected Power Production Sources, Article 691, Large-Scale. EL-1) Are solar PV systems, including photovoltaic modules, panels and arrays, and their associated components, considered to be electrical equipment under the State Electrical Code?

Answer: Yes. A photovoltaic power station, also known as a solar park, solar farm, or solar power plant, is a large-scale grid-connected photovoltaic power system (PV system) designed for the supply of merchant power. Solar and energy storage equipment manufacturers introduce new equipment at seemingly lightning speed, and it can be difficult to keep on.
