# **Electric vehicle infrastructure canberra**

## Overview

---

The Australian Capital Territory (ACT), home to the nation's capital Canberra, leads the country in electric vehicle (EV) adoption. Funding of \$890,000 has been allocated from the Public EV Infrastructure Fund to deliver more than 40 new chargers powering more than 70 charging bays across Canberra. A mix of fast DC and slower AC charging bays will be installed to ensure all businesses and households can access chargers that. The ACT Government, serving as both State Government and Local Council for Canberra's 450,000 residents, has become Australia's leader in the transition of government fleet and private cars to zero-emission vehicles. Their new Zero Emissions Vehicles (ZEV) Strategy outlines how they aim to drastically cut transport emissions and reach net-zero emissions by 2045. This isn't just talk; it's.
