

Espay Solar Energy S.L.

Energy Storage Green Power Fund

Overview

A funding window under the Clean Technology Fund, GESP is a first-of-its-kind investment program dedicated to pilot storage solutions for renewable power, supporting clean energy transitions, and ensuring that consumers have reliable and consistent electricity throughout the day. A funding window under the Clean Technology Fund, GESP is a first-of-its-kind investment program dedicated to pilot storage solutions for renewable power, supporting clean energy transitions, and ensuring that consumers have reliable and consistent electricity throughout the day. Clean energy ETFs offer a diversified investment in the sector, reducing the risk of picking underperforming stocks. Investing in clean energy ETFs enables tailored exposure to sub-sectors like wind or solar, aligning with specific trends. This is a unique. With \$1.5 billion in assets, iShares Global Clean Energy ICLN is the largest clean energy ETF. She covers a wide variety of investing topics including stocks, socially responsible investing, cryptocurrency, mutual funds, HSAs and financial advice. She is also a frequent contributor to NerdWallet's "Smart Money" podcast. By providing low-cost funding for breakthrough storage solutions, we help bring clean electricity to millions of people when they need it.
