

**Espay Solar Energy S.L.**

# **Fiji utility-scale solar**

## Overview

---

Fiji enjoys approximately 280 sunny days annually, making solar power an obvious fit for the country's energy needs. Large-scale solar installations have already proven successful, with the 20MW Rakiraki Solar Farm demonstrating the viability of utility-scale projects. The Fiji Commerce and Employers Federation (FCEF) has presented a probing inquiry into what it claims is a “strategic failure” by Fiji's electricity utility Energy Fiji Ltd (EFL) to deploy solar photovoltaic generation despite dramatic global cost declines. In Part 4 of its 21-page submission to Fiji's 20-year National Development Plan calls for all power to be generated from renewable sources by 2030. In line with this plan, assessments have shown that a combination of solar, wind, geothermal, marine, biomass, and biofuel could be used to meet Fiji's energy needs. Investment opportunities in. Nestled in the heart of the Pacific, Fiji comprises over 300 scattered islands and is home to a population of less than a million, yet it grapples with a profound challenge in ensuring reliable electricity reaches its rural communities, where many remote households lack the basic power needed for. Clay Energy is a leading renewable energy solutions provider. We have delivered sophisticated solutions throughout the region for over 25 years with over 25MW of the solar infrastructure deployed.

## Fiji utility-scale solar

---

### Clay Energy , Fiji

It is the first large-scale grid export solar and battery solution to be deployed in the country, providing the benefit that the battery system can stabilise the grid when sun days are low.

---

### EFL issues global call for contractors for multi-billion-dollar

EFL has outlined four packages to potential bidders. Package A is a solar PV and Battery Energy Storage (?165 MW) turnkey design and construction of utility-scale solar farms, battery ...

### Investment Opportunities in Fiji's Renewable Energy Sector , Solar

Explore top investment opportunities in Fiji's renewable energy sector--solar, hydro, biomass, wind & storage--with tax incentives and clear government targets.

---

### Tariff backlash , Submission questions utility's low solar uptake

The Fiji Commerce and Employers Federation (FCEF) has presented a probing inquiry into what it claims is a "strategic failure" by Fiji's electricity utility Energy Fiji Ltd (EFL) to deploy solar ...

## RUP Investments Sets Fiji Solar Pace with 1.5 MW Expansion Across ...

RUP Investments is accelerating Fiji's clean-energy push with a bold expansion of the Rups Big Bear solar footprint. From a 500 kW base to a planned 1.5 MW of on-grid solar across stores, ...

## How Can Fiji Power Its Rural Future with Renewables?

Beyond the numbers, the quality of energy access in rural Fiji paints an equally concerning picture. Many households with solar systems or other off-grid solutions struggle with ...
