## Overview

---

An investment 'fever' is gripping the new energy storage sector as the ministerial decision was published yesterday (Ma), setting the rules for installations with a total capacity of 4. So far, three auctions have supported 900 MW projects with. Presenting to the Special Standing Committee on Environmental Protection of the Hellenic Parliament on J, Nikos Mantzaris, policy analyst and co-founder of The Green Tank, highlighted Greece's remarkable progress in renewable energy (RES) and the urgent need to scale up storage. A draft ministerial decision envisages the installation of 3. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions. Even though electricity storage is recognized as a prerequisite for the decarbonization of the power sector, the development of storage facilities is still facing legal/regulatory barriers and investment feasibility concerns. Installed capacity has climbed to record levels, with solar photovoltaics and wind power providing a growing share of the country's electricity. The government's ambition to make Greece a.
