

**Espay Solar Energy S.L.**

# **How about uninterrupted power supply for Yerevan solar container communication station**

## Overview

---

The solar deep-cycle battery bank stores the electrical energy generated by the solar panels, ensuring a stable power supply to the communication base stations even when there is no sunlight or insufficient sunlight. This study develops a mathematical model and investigates an optimization approach for optimal sizing and deployment of solar photovoltaic (PV), battery bank storage. Armenia has significant solar energy potential: average annual solar energy flow per square metre of horizontal surface is 1 720. Base station operators deploy a large number of distributed photovoltaics to solve the problems of high energy consumption and high electricity costs of 5G base stations. In this study, the idle space of the. Solar power containers are not merely a niche product but a transformative solution for distributed power. By Zhang Hongguan & Zhang Yufeng Uninterrupted power supply for remote base stations has been a challenge since the founding of the wireless industry, but alternative sources have a chance of succeeding where traditional solutions have failed. That's not sci-fi - it's happening right now in Burkina Faso's capital.
