How big of an inverter should I use for a 220v 550w

Overview

Generally, it's recommended to size the inverter to 80-100% of the DC system's rated capacity. Before determine the inverter size, the most important thing is to calculate your average daily power consumption (kWh) and calculate your solar panel array size to match your power. An inverter needs to supply two needs: Peak or surge power, and the typical or usual power. Some appliances, particularly those. How to determine what size inverter I need?

Before we go any further, we highly recommend that you choose a pure sine wave inverter. This way, none of your appliances run the risk of being damaged. The first step is calculating the total wattage of all devices you want to power simultaneously. Whether you're setting up a solar power system, going off-grid, or simply need a backup for home appliances during a power outage, understanding how to choose the correct inverter size will make.
