

Espay Solar Energy S.L.

How is the photovoltaic panel installation project

Overview

What is the process of getting solar panels installed?

The process starts by contacting a solar installer. **Timeline Reality:** The complete solar installation process typically takes 60-120 days from consultation to activation, with permitting being the longest phase (30-45 days) rather than the actual installation (1-3 days). The first phase is about creating a blueprint for a system that meets your specific energy needs and property characteristics. This comprehensive guide walks you through every step of your solar project, from initial assessment to system. Learn how to install solar panels step-by-step.
