

Espay Solar Energy S.L.

How is the quality of Qianhe photovoltaic panels

Overview

As a rule, Chinese solar panels are as good as any others on the market. Many of the most successful solar panel manufacturers in the world come from China, including LONGi, Jinko, Trina, and Canadian Solar (despite the name). These brands produce a sizable portion of the solar panels used in the United States, and are used in everything from huge utility-scale solar. China is currently the global leader in solar panel manufacturing, with a dominant 80% of the world's solar panel production. According to the latest report by Wood Mackenzie, China manufactures and supplies more than 80% of the world's solar photovoltaic panels (PV) components such as polysilicon, wafers. Selecting a good-quality and reliable solar panel can be very difficult for those unfamiliar with the hundreds of different manufacturers. 15 per watt, significantly lower than in India (\$0.
