Exploring an expanding universe of solar-energy occupations, describing diverse jobs across the industry, charting possible progression between them.

The Complete Guide To Solar Industry Jobs

There are endless opportunities to work in the solar industry, from installers to engineers to manufacturers. According to the 2022 Solar Job Census, nearly 264,000 jobs in the United States ...

Solar Photovoltaic Installers

Solar photovoltaic installers held about 28,600 jobs in 2024. The largest employers of solar photovoltaic installers were as follows: Because photovoltaic (PV) panels convert sunlight into ...

Career Opportunities in Solar Energy

The solar energy sector is experiencing unprecedented growth, with over 7.1 million jobs in solar PV alone as of 2023. For professionals considering a career shift into renewable energy, ...

National Solar Jobs Census 2020

About This Report

Key Findings
Introduction: Solar Workforce Amid The Pandemic
Solar Jobs Fall Primarily Due to Pandemic
Solar Deployment Hits Record Levels Despite Job Loss
Labor Productivity at Record Levels
2020 Employment Breakdown by Sector
Jobs Decline Across All Categories Amid Pandemic
Installation Jobs Drop Across Market Segments
Solar Workforce Grew More Diverse in 2020
Since 2010, the National Solar Jobs Census has been the definitive measure of solar energy industry employment in the United States, charting the growth of the solar workforce alongside the rise of solar energy as a major contributor to the U.S. energy supply and economy as a whole. The Census is a collaborative effort of the Solar Energy Industries Association (SEIA) and the International Trade Administration (ITA). See more on [seia](#) [irecsolar](#) [careermap](#)
