# **How many solar modules are exported from Italy**

## Overview

---

According to Volza's Italy Export data, Italy exported 49 shipments of Solar Panels Modules from Jul 2023 to Jun 2024 (TTM). Volza's Big Data technology scans over 2 billion export shipment records to identify new buyers, profitable markets, reliable suppliers, and promising products. These exports. In 2024, Italy achieved its strongest year of solar growth in over a decade, installing 6.7 GW of new photovoltaic (PV) capacity and bringing cumulative capacity to 37 GW. PV generation reached 36 TWh, covering about 11. In the first half of the year alone, Italy added 3. This rapid expansion follows a record-breaking. Will new PV manufacturing policies in the United States, India and the European Union create global PV supply diversification?

Manufacturing capacity and production in 2027 is an expected value based on announced policies and projects. Alberto Nadai, Area Sales Manager - Northern Italy at Q Cells, analyzes the different sectors and the expected developments.
