

**Espay Solar Energy S.L.**

# **How much income do rural photovoltaic panels generate**

## Overview

---

Solar farming can be profitable, with average returns of 10-15% annually. Initial setup costs range from \$800 to \$1,200 per kW of capacity while operating costs are typically low. Revenue depends on local energy prices and solar irradiance levels. While the initial setup cost can be high. Unlike conventional crops, solar panels deliver predictable income year after year with minimal maintenance requirements. Bureau of Labor Statistics, the number of solar photovoltaic (PV) installers is expected to grow by 63% from 2018 to 2028, much faster than the average for all occupations. However, this is just a ballpark estimation.
