

**Espay Solar Energy S.L.**

# **How much is the labor cost for moving photovoltaic panels**

## Overview

---

The total expense for a residential solar panel move typically falls within a range of \$1,500 to \$6,000 for a standard-sized system. This. The costs can vary based on several factors, including the complexity of the installation, the distance the panels need to be moved, and local labor rates. Several factors determine whether you'll pay closer to \$3,000 or find yourself writing a check for \$15,000 or more. Panel count reigns supreme as the biggest cost driver. They consist of multiple interconnected solar cells, usually made of silicon, which generate direct current (DC) electricity when exposed to sunlight. Potential damage during removal may further reduce performance.
