# **How to make street lights with photovoltaic panels**

## Overview

---

This DIY guide by DEL is useful for installing solar street lights for residential or larger projects. The guide includes a simple solar night lamp or. In this post we are going to discuss how we can build a simple but powerful 40-watt automatic LED street light circuit that will work on its own, ok?

Then when night comes, it will switch ON automatically, and then when the sun rises, it will switch OFF by itself. So we do not have to do anything. Hello. Choose appropriate components, 3. The street light with the photovoltaic shield provides many advantages in comparison to the current street lights. We waste tons of energy every day with street lights lighting places without much use most of the time.
