

**Espay Solar Energy S.L.**

# Hydro Solar Power Station

 **TAX FREE**    

## ENERGY STORAGE SYSTEM

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

## Overview

---

There are three types of hydropower facilities: impoundment, diversion, and pumped storage. China is a global leader in developing renewable energy, and the Kela photovoltaic (PV) power station is adding to the country's energy mix as the world's largest hybrid solar-hydropower plant. The Kela station idea was formed by the Design and Research Institute of Power China Chengdu in 2016. Kela PV Power Plant Phase I, in the Yalong River Basin in China's Sichuan Province, covers around 16 million square metres and combines solar & hydropower. Located in the Yalong River Basin in the Tibetan Autonomous Prefecture of Garze, Yajiang County in the southwest Sichuan Province, China is Kela. Newsletters From daily news and career tips to monthly insights on AI, sustainability, software, and more—pick what matters and get it in your inbox. We empower professionals with advanced engineering and. Originating from Bayan Har Mountains in Qinghai Province, China, the Yalong River flows for thousands of miles, where it eventually merges with the Jinsha River in Panzhihua, Sichuan Province. On a snowy mountain at an altitude of 4600 meters in western Sichuan, rows of blue PV panels are. Editor's note: Kela, a mega hydro-photovoltaic (PV) complementary power station constructed by China, will undoubtedly be inked in history for its unprecedented installed capacity scale of 1 million kilowatts. CGTN takes notes on its grand commencement of initial operation on J. Kela PV power plant is located at the West Sichuan Plateau.

## Hydro Solar Power Station

---

### China's Kela Photovoltaic Power Station is now Operational

The Kela Photovoltaic Power Station, acclaimed as the world's largest and highest-altitude hydro-solar power plant, stands as a testament to China's commitment to renewable energy and ...

### China, renewable energy, Kela power station, hybrid solar-hydropower

China has solidified its position as a global leader in renewable energy with the launch of the Kela photovoltaic (PV) power station, now officially recognized as the world's largest hybrid solar ...

### China On 'Record-Breaking' Spree, Again! Begins Work On World's ...

On July 8, China started constructing the Kela photovoltaic power station, a crucial component of the hydro-solar hybrid power station in southwest China with the highest installed ...

Behind the world's largest and

## highest hydro-solar project

With the core of Kela PV Power Plant being based on hydro-solar collaboration, the facility doubles down on clean energy efficiency by feeding unstable solar directly into the Lianghekou ...

## World's largest hydro-PV station now operating in China

China is a global leader in developing renewable energy, and the Kela photovoltaic (PV) power station is adding to the country's energy mix as the world's largest hybrid solar-hydropower ...

## World's largest hydro-solar power station fully operational in China

The world's largest and highest-altitude hydro-solar power plant, which generates power through a water-light complementary manner, entered full operation in China on Sunday.

## Light Up the Land Where Solar and Hydro Meet at the World's Largest

On a snowy mountain at an altitude of 4600 meters in western Sichuan, rows of blue PV panels are generating electricity

from solar energy, while the Yalong River is roaring in the distance. ...

---

## China Kela 1000MW Hydro-solar Complementary Power Plant

With installation of 523.1MW Astronergy PV modules, the first phase of the world's largest hydro-solar power plant - Kela solar power plant, also the world's highest power station of its kind, started power ...

---

## World's largest hydro-solar power plant enters full operation in China

After overcoming the challenges of building at high altitudes with low oxygen levels, the newly-designed hydro-solar power plant entered full operations on Sunday, and is said to be the

---

## Types of Hydropower Plants

A PSH facility is able to store the electricity generated by other power sources, like solar, wind, and nuclear, for later use. These facilities store energy by

pumping water from a reservoir at a lower ...
