# **Is lithium battery energy storage safe for outdoor use**

## Overview

---

Using lithium-ion batteries outside their battery pack is dangerous because it can lead to short circuits, thermal runaway, and potential explosions. A battery pack is designed to safely contain and manage the components of the lithium-ion battery, ensuring proper function and. Battery Energy Storage Systems, or BESS, help stabilize electrical grids by providing steady power flow despite fluctuations from inconsistent generation of renewable energy sources and other disruptions. While BESS technology is designed to bolster grid reliability, lithium battery fires at some. Store lithium-ion battery packs in a cool, dry place. Use protective cases to prevent contact. Also, be aware of the state of charge while storing. When stored incorrectly, internal reactions can accelerate, causing faster self-discharge, reduced capacity, or even permanent damage.
