

Espay Solar Energy S.L.

Is there any wind power generation recently

Overview

According to the latest “US Wind Energy Monitor” report from Wood Mackenzie and the American Clean Power Association (ACP), developers installed 593 megawatts (MW) of new wind capacity in Q2 2025 - a 60% drop from the same quarter last year. Wind power has been the largest source of renewable energy in the U. since 2019, with more than 153 GW installed. Although the country's capacity more than doubled from 2014 to 2023, most of the wind energy produced is onshore, with the offshore wind farms slowly rising. Germany-based renewables developer and service provider Q Energy is preparing to build. The top wind energy projects supporting the energy transition include companies like China Longyuan Power, SSE Renewables, Equinor, Ørsted and Enercon. Ambitious government policies, technical advancements and increasing investor confidence are pushing wind energy to new heights around the world. 4 TWh produced during the year. The United States is the second-largest producer of wind power, and generated 341.
