# **Jiang 5000w solar power plant**

## Overview

---

The world's biggest solar plant has come online in China, capable of powering a small country with its annual capacity of more than 6 billion kilowatt hours. The facility in a desert region of the north-west province of Xinjiang covers 200,000 acres - roughly the same area as New York City. This development strengthens China's position as a leader in renewable energy and. Recently, a subsidiary of the China Green Development Investment Group has inaugurated the world's largest solar plant, a 3.
