Latest policy on hydrogen energy storage system

Overview

This page was updated in December 2023 to reflect the latest developments in U. The following policies and acts contain significant hydrogen- and fuel cell-related provisions that guide and provide support for the DOE Hydrogen Program. On the pathway to decarbonization, energy efficiency, renewable power and direct electrification can reduce emissions from electricity production, light and low-temperature industrial processes. The U. HFTO is part of a portfolio. The Annual Energy Outlook 2025 (AEO2025) explores potential long-term energy trends in the United States.
