

Espay Solar Energy S.L.

Long-term discount for solar-powered containers used in base stations

Overview

While the initial investment in a shipping container solar system may be higher than a diesel generator, the long-term savings are significant. There's no ongoing fuel cost, and maintenance requirements are much lower. Solar-powered base stations significantly reduce carbon emissions, as well as potential costs savings in the long term by avoiding the need to pay for energy. Solar systems also eliminate the need for expensive grid extensions in remote. The United States alone forecasts solar power generation to grow 75% by 2025, with wind power generation expected to grow 11%. How many containers do you need?
