Manufacturer of photovoltaic panels with the highest mass production efficiency

Overview

According to the June 2025 update of TaiyangNews' Monthly Ranking of Commercially Available High-Efficiency Modules, AIKO's module efficiency has been elevated to 24.4%, once again securing the top position in the global ranking — a position the company has held uninterrupted since. Industry-Wide Pressure, Persistently Low Operational Rates: In October, as many as 13 of the TOP 20 companies had operational rates below 50%, with the industry average around just 45%. This indicates that over half of the industry's capacity is idle, with structural overcapacity being the core. Against the backdrop of an accelerating global energy transition, the total installed photovoltaic capacity worldwide is expected to exceed 1,200 GW by 2025. These 12 suppliers are known for their durability, warranty strength, and global reputation. In recent years, global production of crystalline silicon modules exceeded five hundred gigawatts, nearly doubling the previous year.
