

**Espay Solar Energy S.L.**

# **National solar power generation table**

## Overview

---

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this document. Net Generation by Energy Source: Total (All Sectors), 2015-November 2025 . The American Public Power Association is the voice of not-for-profit, community-owned utilities that power approximately 2,000 towns and cities nationwide. We represent public power before the federal government to protect the interests of the more than 55 million people that public power utilities. Data from 2007 through 2024. Source: Berkeley Lab, Utility-Scale Solar Data Update 2025 Copyright (c) 2025, The Regents of the University of California, through Lawrence Berkeley National Laboratory (subject to receipt of any required approvals from the U. Wind and solar combined produced a record 17% of US electricity in 2024, overtaking coal at 15% for the first time. The year-on-year increase in solar generation, larger than than the 59 TWh rise. In 2024, net solar power generation in the United States reached its highest point yet at 218. 5 terawatt hours of solar thermal and photovoltaic (PV) power. In 2024, utility-scale solar power generated 219.

## National solar power generation table

---

### Solar power generation, 2025

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

---

### America's Electricity Generation Capacity, 2025 Update

Tables 2.1-2.4 show the fuel makeup of generation capacity under construction, permitted, with an application pending, or proposed. Solar comprises the largest share of all four development categories.

---

### Electric Power Monthly

Table 1.1. Net Generation by Energy Source: Total (All Sectors), 2015-November 2025.

---

### Utility-Scale PV , Electricity , 2023 , ATB , NLR

2023 ATB data for utility-scale solar photovoltaics (PV) are shown above, with a Base Year of 2021. The Base Year estimates rely on modeled capital expenditures (CAPEX) and operation and maintenance ...

### Solar power in the United States

Solar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2024, utility-scale solar power generated 219.8 terawatt ...

### Electric Power Monthly

Estimated small scale solar photovoltaic generation and small scale solar photovoltaic capacity are based on data from Form EIA-861M, Form EIA-861 and from estimation methods ...

### US Electricity Net Generation From Solar in All Sectors (Mo...

US Electricity Net Generation From Solar in All Sectors is at a current level of 27.96B, down from 31.50B last month and up from 20.54B one year ago. This is

a change of -11.25% from ...

## US Electricity 2025 - Special Report

The US clean electricity transition continued as wind and solar generated more than coal for the first time. Electricity demand growth sped up and solar generation rose more quickly than gas ...

## Capacity and Generation by State , Energy Markets

Data from 2007 through 2024. Source: Berkeley Lab, Utility-Scale Solar Data Update 2025

## U.S. solar power generation 2024, Statista

In 2024, net solar power generation in the United States reached its highest point yet at 218.5 terawatt hours of solar thermal and photovoltaic (PV) power.
