Norway battery electric vehicles bevs

Overview

What a market penetration: battery-electric cars accounted for 95.9% of all new passenger car registrations in Norway in the past year. Norway has long been considered a role model for electric vehicles, and the 2025 annual statistics impressively reinforce this: 96 percent of new cars were electric vehicles. In September, BEVs accounted for 96% of new-car sales, edging the country closer to a target of selling 100% battery-powered models as of next year.
