# **Papua new guinea electric vehicle infrastructure**

## Overview

---

Papua New Guinea is looking at transforming its transport sector to a low carbon transportation and climate resilient development to reduce its net emissions by 2030. This by introducing pure electric Vehicles and Hybrid electric vehicles to the Country. As the global push for sustainability gains momentum, PNG is not far behind in its efforts to reduce carbon emissions and promote cleaner, more efficient. It has been projected that the number of vehicles in PNG will grow from 155,000 in 2005 to over 600,000 by 2030 with emissions likely to increase to up to 4. Managing Director Leon Shi shares the firm's EV rollout plans with Business Advantage PNG. Credit: Niugini Automobiles. The Green Finance Centre (GFC) is leading the way in driving sustainable change in Papua New Guinea (PNG) as it plays a critical role in the recent 2nd Technical Working Committee (TWC) meeting held at the Lamana Hotel in Port Moresby. The event, part of the Green Climate Fund's (GCF) Readiness. Port Moresby, Papua New Guinea | 14 July 2025 - Papua New Guinea marked a significant milestone in its journey toward a cleaner, more sustainable transport sector with the successful hosting of the Validation Workshop for the National Electric Vehicle (EV) Communication Strategy and.
