## Overview

---

When news broke about photovoltaic panel manufacturers closing down in 2023, solar enthusiasts panicked like chickens spotting a solar eclipse. However, 2024 has brought immense challenges, with higher interest rates, tighter financing, and adverse policy shifts in key states contributing to over 100 solar bankruptcies based on our industry data, a number unseen before in our almost 20 years in the solar sector. California was particularly. After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined. This led to large capital injections, major bankruptcies, and job losses. From pv magazine USA In the residential solar sector, the industry has long sought the “holy grail” of. A decade ago, someone knocking on your door to sell you solar panels would have been selling you solar panels. Complete Solar purchased some of.
