# **Photovoltaic panel installation in Xiong District**

## Overview

---

In April 2017, China announced a plan to establish the Xiong'an New Area, which spans the Rongcheng, Anxin and Xiongxin counties, as well as some adjacent areas in north China's Hebei Province. In total, some 28,400 solar panels, each measuring 117 centimeters in length and 30 centimeters in width, have been installed on the roofs of six buildings in the complex, said Huang Wenchang, an executive with China Xiongan Group, the operator of the center. The new area aims to relieve Beijing of non-essential functions related to its status as the nation's. Chinese solar panel installers – showing companies in China that undertake solar panel installation, including rooftop and standalone solar systems. 294 installers based in China are listed below. Xiong'an's development strategy aligns with a 2018 planning outline emphasizing. The CSCEC-built green building display center is located at Rongdong District, Xiong'an New Area, and consists of 7 single buildings with the total construction area of 75,000 square meters. A night rendering of the center The project team has built Building No.
