Standard Sizes: Do the common panel dimensions (e., 19mm, 25mm, 38mm) sufficient to meet load-bearing requirements (e., pedestrian traffic, light vehicles, or heavy machinery)?

2. Open Area &. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at [www.nrel.gov](http://www.nrel.gov). National Renewable Energy Laboratory, Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLaMP) PV O&M Best Practices. Photovoltaic panel operation and maintenance channel installation tems with the goal of reducing the cost of O&M and increasing its effectiveness. Reported O&M costs vary widely, and a more standardized approach to pl nning and delivering O&M can make costs m nced maintenance approaches evident in the wind industry. Recent NREL studies show well-maintained systems outperform neglected ones by 18-23% annually. But how do we keep these.
