

Espay Solar Energy S.L.

Photovoltaic panels installed around the tomb

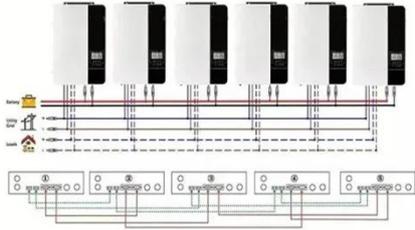

Overview

This initiative, called 'Requiem in Power' (RIP), involves installing thousands of solar panels across various graveyards, creating a unique green energy hub that honours the past to power the future. Valencia, a major city on Spain's east coast, is pioneering an innovative approach to renewable energy. The project has been dubbed RIP - standing for Requiem in Power - and was launched this month with the first photovoltaic panels installed. Her scientific interests include genomics, personalized medicine, and bioethics.
