Plug-in electric vehicles phev amsterdam

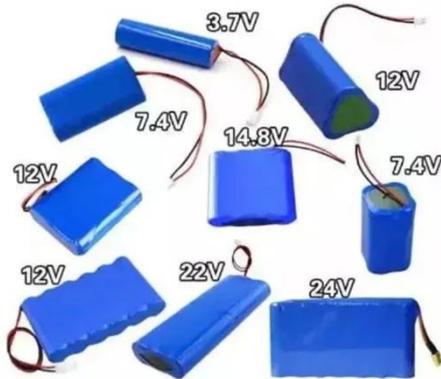

Overview

As of 31 December 2021, there were 390,454 highway-legal light-duty plug-in electric vehicles in use in the Netherlands, consisting of 137,663 fully electric cars, 243,664 plug-in hybrid cars, and 9,127 light duty plug-in commercial vehicles. These purchase incentives have been adjusted over time. However, once you own one, there are a couple of things to consider, such as: and Dutch car insurance. Sounds like a lot?

Don't. The Netherlands has reached a major electric mobility milestone: over one million plug-in vehicles are now on the road. The scheme is one of the latest in the Dutch government's efforts to subsidize electric vehicles and boost their adoption by consumers. A total of 18,792 EVs (BEVs and PHEVs) were registered in the Netherlands last month.
