Overview

To address these challenges, a robust power supply scheme has been developed using Pulse Frequency Modulation (PFM), isolated AC-DC converters, and Zero Voltage Switching (ZVS) regulators. When natural disasters cut off power grids, when extreme weather threatens power supply safety, our communication backup power system with intelligent charge/discharge management and military-grade protection becomes the "second lifeline" for base station equipment. For base stations located in deserts or other extreme environments, independent power supply is essential, as these areas are not only. Power supplies can be employed in each of the three systems that compose wireless base stations. These three systems are known as the environmental monitoring system, the data communication system, and the power supply system. Each of these systems is in turn divided into smaller sections and.
