. PV combiner boxes are also known as solar array combiners or solar power electronics enclosures. They serve the purpose of grouping several photovoltaic (PV) strings and directing the current to a regulated inverter. Its main purpose is to combine multiple DC inputs from the panels in the system into a single DC output. This output is then connected to a charge controller or inverter, depending on the type of. Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I,V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems. Weidmüller offers a.
