

Espay Solar Energy S.L.

Product features of solar panels

Overview

There are four main types of solar panels: monocrystalline, polycrystalline, thin-film, passive emitter, and rear cell (PERC) solar panels. What kind of home do you live in?

When you're considering whether to get solar panels, it's a good idea to look into all the different types, to ensure you choose the best. There are four main types of solar panels to choose from, and the best one for your home depends on your unique needs. When deciding, consider factors like your budget, roof size, sun exposure, and energy efficiency goals. The right panel can help you save on energy costs while matching your home's. Dual-Glass Panels Offer Premium Performance Benefits: Glass-glass construction provides 30+ year operational life, bifacial power generation (10-25% additional yield), and superior resistance to potential-induced degradation, though requiring specialized mounting for increased weight. They come in different types, each possessing unique features suited to different applications. We'll also introduce PRBS, a trusted manufacturer specializing in high-quality solar panels engineered for maximum performance across diverse applications.
