Professional website for microgrid energy storage

Overview

Micro BESS is a collaborative network of industry leaders, innovators, and companies specializing in renewable energy and energy storage solutions. ELM MicroGrid delivers scalable Battery Energy Storage Systems (BESS) starting at 100kW and powering projects up to 100MWh and beyond. Our modular systems can be paralleled to meet large-scale energy demands, providing reliable, resilient, and intelligent energy storage solutions tailored to any. Energy storage enables microgrids to respond to variability or loss of generation sources. Getting it wrong is an expensive and dangerous mistake. Solar energy systems allow you to hedge against fluctuating energy prices by essentially fixing the cost of your electricity for the lifetime of the system. UL Solutions helps customers model and optimize microgrid and hybrid power systems to maximize efficiency, cost-savings and revenue. Whether your system is behind-the-meter or in front, on-grid or off-grid, kilowatts or gigawatts, we have a solution for you.
