

**Espay Solar Energy S.L.**

# **Quito renewable energy growth**

## Overview

---

By 2021, the installed capacity of solar power had reached over 28 MW, and projections suggest significant growth by 2024. Ecuador is making significant strides in the renewable energy sector, leveraging its natural resources to support sustainable economic growth and reduce reliance on fossil fuels. Electricity demand continues to increase, and Ecuador urgently needs to increase generation capacity and accelerate investments to meet demand. 5 percent of GDP to mitigate and adapt to climate change Quito, Septem- A robust climate policy program would enable Ecuador to boost economic growth and reduce poverty, according to the World Bank Group's Country. Petroleum liquids and renewable energy, specifically hydroelectric energy, account for most of Ecuador's energy use (Table 1). Ecuador's energy production increased by a compounded growth rate of 0. 5% per year from 2011 to 2021, and renewables accounted for most of the increase.

## Quito renewable energy growth
