## Overview

---

The Regional Microgrids Program (the Program) has up to \$125 million to develop and deploy renewable energy microgrids across regional Australia, with a stream for First Nation Communities and one focused on innovation and resilience. The new projects will reach 35 towns and villages. Dan Ton is Program Manager at the U. 47 billion in funding for measures that aim to lower energy prices, reduce emissions and boost the economy. It integrates. The rise of affordable small-scale renewable energy, like rooftop solar panels, is reshaping energy systems around the world. This shift away from fossil fuel-powered grids creates new opportunities for energy distribution that prioritize decentralized energy ownership and community empowerment.
