

**Espay Solar Energy S.L.**

# **Renewable electricity cape town**

## Overview

---

Cape Town's Small-Scale Energy Generation (SSEG) programme promotes the uptake of rooftop solar photovoltaic (PV) systems and small wind turbines in the commercial and residential sectors, allowing consumers to become producers and sell excess electricity generated back to the grid. Cape Town's Small-Scale Energy Generation (SSEG) programme promotes the uptake of rooftop solar photovoltaic (PV) systems and small wind turbines in the commercial and residential sectors, allowing consumers to become producers and sell excess electricity generated back to the grid. omy infrastructure solutions. Working in developing countries, GreenCape catalyses the replication and large-scale uptake of these solutions to enable each countr s market intelligence report. As they strive to build an economically stable and inclusive community, the city can thrive in good health. Cape Town, with its focus on solar, wind, and hydroelectric power, is at the forefront of this transformation. Our commitment to sustainability is evident in our actionable plans and ambitious renewable energy. ogy change, regulatory change, and climate change. These changes are affecting every aspect of how energy is generated, distributed and used. In responding to these. Cape Town has marked two major milestones in its transition to cleaner, more reliable energy, unveiling a new gas-to-energy facility at the Coastal Park Landfill while announcing significant growth in small-scale embedded solar generation across the city. Mayor Geordin Hill-Lewis and Urban Waste.
