

Espay Solar Energy S.L.

State-owned solar power station

Overview

State-owned solar plants reduce reliance on imported fossil fuels and create a more stable energy landscape by utilizing domestically sourced solar power. Ranking 2nd in the nation, Texas has 48.2 GW installed and is expected to continue to grow. The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. (Updated September 2024) Get familiar with our list of the largest US-based solar photovoltaic plants with a capacity accounting for hundreds of megawatts. It includes corresponding PV facility information, including panel type, site type, and initial year of operation.

State-owned solar power station

The U.S. Large-Scale Solar Photovoltaic Database

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

Ivanpah Solar Power Facility

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.

What are the state-owned solar plants? , NenPower

State-owned solar plants reduce reliance on imported fossil fuels and create a more stable energy landscape by utilizing domestically sourced solar power. This initiative not only ...

Solar power in the United States

The largest solar thermal power plant in the world is the 392 MW Ivanpah Solar Power Facility, in California. It deploys 173,500 heliostats each with two mirrors focusing solar energy on boilers ...

Ivanpah Solar Power Facility

OverviewDescriptionFossil fuel consumptionEconomic impactPerformanceEnvironmental impactsIn popular cultureExternal links

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada. It was slated to close in 2026, but that decision has been reversed by the California Public Utilities Commission. The facility derives its name from its proximity to Ivanpah, California, which lies within the Mojave

National Preserve

Solar Capacity by State 2026

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

Solar State By State - SEIA

Explore the latest solar market insights and policy updates in all 50 states and Washington, D.C. All market data is current through Q3 2025. California leads as the top solar state. With over 54 GW of ...

Largest solar power plants in USA

Over a half of the top nation's utility-scale PV projects are based in California - the sunniest state of the country. The Beach State houses the largest solar power station as of 2020 - 579MWAC Solar Star. ...

US Solar Farm Map

On this page, you can explore our real-time database of solar farms in the US.

Each month, we track solar projects in the state and update our list of the largest solar farms in the US.

Top U.S. states in solar PV capacity 2025, Statista

California has by far the greatest installed capacity of solar photovoltaic (PV) power of any U.S.
