# Taipei energy conservation

## Overview

---

To align with the policies of net-zero emissions by 2050, the Taipei City Government is encouraging residential and community sectors to transition from merely reducing energy consumption and carbon emissions to adopting sustainable energy practices that include energy generation. To align with the policies of net-zero emissions by 2050, the Taipei City Government is encouraging residential and community sectors to transition from merely reducing energy consumption and carbon emissions to adopting sustainable energy practices that include energy generation. By 2030, ensure universal access to affordable, reliable and modern energy services. By 2030, increase substantially the share of renewable energy in the global energy mix. In line with the Taipei City Self-government Ordinance for Green Buildings, the City continues to promote green building. This makes reducing carbon emissions and enhancing energy efficiency in existing buildings and built communities pivotal to achieving the city's goals of a 30% carbon reduction by 2030 (with 2005 as the baseline year) and reaching net-zero emissions by 2050. In 2022, New Taipei City unveiled the. The Japanese Ministry of the Environment on Wednesday last week began operating its special heatstroke alert system, in which alerts are issued in areas one day before there is a high risk of heat stroke based on the predicted wet bulb globe temperature. The Japanese government has also urged the. Taiwan's energy transition principle is based on "promote green energy, increase natural gas, reduce coal-fired, achieve nuclear-free" to ensure a stable power supply and to reduce air pollution and carbon emissions. New Taipei City's Climate Action Plan aims to bring about urban transformation by implementing more green buildings, cleaner energy, smart transportation, efficient resource allocation and sustainable. The city government hopes to promote sustainable development goals (SDGs) and improve the earth's environment while providing a better future for all our employees. The New Taipei City Hall is a public building that has now been standing for over 20 years. It has undergone a three-stage.
